Covid Safety Protocols

In addition to our usual bespoke service we've implemented a set of covid protocols so you receive your rental equipment in a safe and secure manner.

1

Our staff are regularly tested for SARS-CoV-2.

2

Our ski techs conduct all fittings wearing masks (N95 grade) and gloves.

3

Free masks and gloves are provided to clients for the purpose of fittings.

4

Through-out our fitting service, all equipment will be handled with gloves.

5

At the end of the fitting, all equipment will be sprayed and cleaned with anti-viral spray.

6

Your equipment is now fully clean, fully safe and ready to be used!

HAPPY SKIING!
